

Company Profile

History

Established in 1975, Nasatka Security pioneered the first crash-tested vehicle barrier system developed, manufactured, and installed in the United States. Headquartered in the Washington, D.C. area with a U.S.-based manufacturing facility, Nasatka has spent five decades protecting some of the world's highest-profile military bases, federal facilities, energy infrastructure, and commercial campuses. As the original barrier innovators, we continue to shape the future of perimeter security through relentless innovation and proven results.

Company Overview

For more than 50 years, Nasatka Security has remained an industry leader through a commitment to engineering excellence, research and development, and mission-critical reliability. Our crash-rated barriers, bollards, gates, and M-rated technologies serve as both powerful deterrents and reassurance for those within secure perimeters. Whether the goal is preventing unauthorized access or stopping vehicle-borne threats, Nasatka systems are designed to perform—when failure is not an option.

Products & Services Overview

In a world of evolving threats, Nasatka and our global Alliance Partners deliver fully integrated, turnkey perimeter security solutions. Our offerings cover every phase of implementation—from assessment and planning to fabrication, installation, and long-term support—customized to meet the specific needs of each site, facility, or mission.

Facility Security Assessment

Nasatka offers complimentary site evaluations to assist with planning and implementing perimeter vehicle-access control strategies. Our experts work closely with clients from concept through completion, and support future expansions or upgrades with long-term strategic insight.

Architectural and Engineering Specification

We collaborate with architects, engineers, and contractors to deliver precise technical documentation and ensure seamless integration of Nasatka systems into any physical security blueprint.

Security Integration

Drawing from over 50 years of hands-on field experience, Nasatka specializes in customizing solutions that unify mechanical barriers, access control, surveillance, and detection technologies. We design systems to work as one—maximizing security and operational continuity.

Installation Support

Our barrier systems are installed by seasoned professionals with deep expertise in system design, fabrication, and deployment. From on-site coordination to troubleshooting, Nasatka ensures smooth installation and rapid activation of secure perimeters.

Maintenance & Lifecycle Support

Nasatka's certified National Alliance Partner Network provides comprehensive service nationwide, offering preventive maintenance, repairs, replacement parts, and long-term system support. Our commitment doesn't end with installation—it extends through the entire lifecycle of your perimeter security system.
